

## Inclusion

### »Be different without fear«

At our school all children participate and are involved – from the first moment on. This allows every child to get the support they need.

## Learning philosophy

### »Together from 1 to 13«

In our school we learn in groups: everyone from one another. We use the differences within the group to genuinely include everyone. Learning means: to wonder, to look beyond the surface, to become ever more curious. Each day is different.

## We offer:

### Space

Our school offers the space for children to shape their environment. Here children can leave their mark.

### Time

We work with new concepts of time. Thereby allowing us to respond to every child. We adjust the learning to meet the child where he or she is and not the other way around.

### Our Team

At our school people from all different walks of life work together. We want to ensure a successful learning experience for everyone.

## University of Cologne Teaching School

### »A school that researches and trains teachers«

In our school grown-ups learn as well. We are a teaching school: together with the University of Cologne we constantly re-evaluate our methods. In the process, we pay attention to research and experiences from different countries.

## Democracy

### »Everyone has a voice!«

In our school everyone is able to be who they are. Everyone has the same rights. Everyone looks out for one another. Everyone can participate in decision-making: we live democracy. In our school everyone has a place.

## We hold firm:

We write down goals. We encourage independent learning and communicate developments with both the children and parents.

## We are amazed:

We are amazed by the growth in all those who take part.
